How to REMOVE a Door Handle!

1. Locate the handle with screws (B).
Remove the screws (E) with screw driver.

NOTE: Only inside handle will have the screws. While unscrewing the last screw - gently pull both handles away from each other.

How to REMOVE a Door Handle!

2. Locate 2 screws (D) above and below latch (C). These screws are embedded in the wood of the door, so remove them slowly as not to strip the wood holes.
